Tennis Club Les Trieres, Nabeul (2012–18)

Yessine Lassoued

Senior Data Scientist | AI & Data Consultant

Nabeul, Tunisia | yessinelass@gmail.com | +216 25 914 070 | LinkedIn: Yessine Lassoued

PROFESSIONAL SUMMARY

Senior Data Scientist with 5+ years of experience delivering scalable data and AI solutions across Retail, Telco, and Logistics industries. Expert in machine learning, customer analytics, and AI-driven automation. Proven ability to lead teams, optimize business performance, and deploy production-grade models with measurable impact.

PROFESSIONAL EXPERIENCE

Senior Data Scientist

DocShipper – International Logistics | Tunisia

Nov 2024 – Jul 2026

- Led a Data & AI team (5+ members) delivering BI, predictive analytics, and AI solutions.
- Developed real-time operational dashboards (SQL, Zoho Analytics) improving executive decision-making speed.
- Built a deal scoring model that increased high-quality lead prioritization across the sourcing pipeline.
- Designed an agent performance scoring system, optimizing sales deal allocation based on historical data.
- Developed a multi-channel AI chatbot (LangChain, RAG, Redis, MongoDB) for lead qualification and customer support automation across WhatsApp and CRM.
- Automated business email workflows using n8n, significantly reducing manual operations.
- Built an AI-driven social media engagement platform generating inbound leads and increasing organic reach (YouTube, Quora, X, Reddit).

Data Scientist – HR Analytics Platform

TOP Team | Tunisia

Jun 2024 – Oct 2024

- Developed a SaaS HR analytics solution using machine learning to reduce employee turnover.
- Built predictive models identifying attrition risk based on organizational KPIs and behavioral data.
- Identified key drivers of employee churn using ML explainability techniques (feature importance).
- Delivered actionable insights through interactive dashboards with per-employee recommendations.

Data Scientist / Technical Lead (Retail & Telco)

Splio | Tunisia

Jan 2021 – May 2024

- Technical lead on international grand-account projects across Retail and Telecom verticals.

Retail Clients: Decathlon, GoSport, Courir, Lagardere, Virgin, Galec, Ginger

- Built customer segmentation models (RFM/RFI) improving campaign targeting and marketing precision.
- Designed and deployed daily data ingestion pipelines and automated KPI computation systems.
- Conducted multi-source data quality audits and statistical model validation.
- Developed generic scripts for marketing KPI updates, improving campaign accuracy across accounts.

Telco Clients: Ooredoo (Oman, Kuwait, Algeria), Orange Cameroun, Free Senegal, Dhiragu Maldives

- Developed churn, upsell, and cross-sell scoring models deployed in production.
- Improved prediction reliability through systematic quality audits communicated to international clients.
- Automated daily data processing workflows, reducing turnaround time significantly.
- Led client communication, brief framing, and execution task coordination.

PROJECT HIGHLIGHTS

AI Chatbot for Lead Qualification

LangChain + RAG, multi-channel: WhatsApp & CRM

Customer Segmentation Engine

Retail — RFM/RFI production models, grand accounts

Churn Prediction Models

Telco — churn, upsell & cross-sell scoring

AI Social Media Automation Platform

Multi-platform: YouTube, Quora, X, Reddit

Deal & Agent Scoring System

ML prioritization + sales agent ranking at DocShipper

HR Attrition Prediction SaaS

SaaS platform — ML explainability + interactive BI

ADDITIONAL INFORMATION

- Open to relocation.
- Experienced with international clients and cross-cultural remote collaboration.
- Strong business acumen with proven client-facing communication and project coordination skills.
